

TAPPAN ZEE BRIDGE/I-287 ENVIRONMENTAL REVIEW

Bus Routes in White Plains

Bus Lanes Alternative Route

Busway Alternative Route

Proposed Routes into White Plains from the West (Route 119)

The Bus Lanes Alternative will use Main Street and Hamilton Avenue to and from the White Plains Transportation Center

The Busway Alternative will cross the Bronx River Park Reserve to a new underpass beneath the Harlem Line tracks to and from Water Street and the White Plains Transportation Center

Discussion

BRT route into and through downtown uses dedicated lanes and there are three proposed stations. Dedicated lanes on Main Street and Hamilton Avenue were evaluated:

- Bus lanes on Hamilton Avenue and Main Street create severe traffic impacts on Main Street
- Bus lanes on Hamilton Avenue (bi-directional) have less impacts to downtown traffic
